

Taller de Orfebrería

SAC

The “Taller de Orfebrería” is an industrial space located in the heart of Seville, ready to host events and presentations with a capacity of up to 100 people.

It is the oldest workshop in the city of Seville, founded in the 19th century. Currently active, its artisans keep alive the ancient and artistic craft of Andalusian goldsmithing. A unique space where art permeates the entire industrial environment.

This distinctive venue, recently renovated and refurbished, permits the hosting of events of any kind. Its interior architecture has been transformed into a modern space, where each room is adorned with handcrafted corten steel sculptures, making it a highly exclusive space.

The space is divided into three warehouses, one of them dedicated to artisan workshops, and the central warehouse with a pitched roof and skylights, and industrial flooring, can be used to organize events, presentations, and dinners. The third warehouse is adapted for small presentations and separated by large glass windows that integrate it into the surroundings, with an exhibition wall where some of the works developed in the workshops can be observed.

With a capacity of up to 100 people, the space offers a unique atmosphere where attendees can take part in an evening surrounded by works of art, illuminated with evocative lighting in an industrial setting.

The workshop provides a guided tour led by its artisans, allowing visitors to learn and appreciate the process of creating the delicate and beautiful pieces crafted in goldsmithing, making it the most important workshop in Seville.
